WEIGHING PROCESS WITH ERP SYSTEMS

Weighing - Most accurate inventory control methods
Requires better realtime visibility and process integration

ABOUT ENDEL DIGITAL

Endel Digital is an industrial software solutions provider, having presence in India, Middle East, and Africa with a strong industrial lineage. Endel Digital delves deep into the realm of the customized solutions by conceptualizing and delivering top-of-the-line weighing software solutions. We offer an array of solutions catering to a wide range of industry requirements by leveraging on its domain competence and partnerships with reputed technology providers.

Tailor-made
solutions for all
weighing software
requirements

Part of E-Global
Group
of Companies

PROBLEM WITH STANDALONE WEIGHING SYSTEMS

Non-integrated weighing systems with ERP are counter productive for Enterprises And requires digital transformation

TIME CONSUMING

CSV export/import and manual excel reporting requires time & efforts and is does not give realtime visibility

VULNERABLE TO HUMAN ERROR

Typing error, readability error, wrong vehicle number or weightment data requires reconciliation

MATERIAL LOSS

Wrong entry of weightment can lead to material loss

THE PARADISE

Endel Digital's Weighing operations management solution provides

OUT OF THE BOX INTEGRATION

Solution integrates with ERP system Using API for realtime information exchange

COST OF USAGE

Major weighing process reports available out of the box. Weighing reports from all locations in a single screen

WORKFLOW AUTOMATION

Adapt to enterprise' workflow. Supports one click weighbridge Operations

Directly integrate with Tally to simplify all accounting activities

WEIGHMAST

Agile, customizable, fit for purpose weighing operations management
Software with Unmanned Operations and Cloud deployment option

KEY FEATURES OF WEIGHMAST

WeighMAST provides features like CCTV image capture, email, SMS, Barcode and custom receipt Design. It supports multi deck, multi Weighbridge.

Unmanned solution
with RFID / ANPR based
Automation

Integration with
gate management systems/
3rd party applications

Can be used in SaaS
mode or deployed in
private cloud

ELEVATE YOUR OPERATIONS WITH **TRUEPILOT**

Discover the unique advantages that set **TruePILOT** apart in the plant management landscape. Our innovative features empower businesses to enhance efficiency, achieve Real-time insights, and Ensure seamless integration, all while maintaining the highest standards of security and compliance. Transforming your plant into a smart factory today!

Modular and Customizable Design

TruePILOT's flexible architecture allows businesses to tailor modules according to their specific needs, ensuring that the system grows with them.

Real-Time Data Analytics

With advanced AI-driven analytics, TruePILOT provides actionable insights and trend analysis, enabling businesses to make informed decisions quickly.

Seamless Integration Capabilities

TruePILOT effortlessly integrates with existing systems, including ERP and machinery, providing a unified platform for enhanced operational efficiency.

Comprehensive Visibility Across Operations

TruePILOT offers complete transparency into all aspects of plant operations, helping organizations monitor performance, quality, and compliance in real-time.

Enhanced Security Features

With robust access control and monitoring solutions, TruePILOT ensures that your plant operations are secure and compliant with industry standards.

Dispatch Management For
India's Largest RMC
Company

Visitor Management and
weighing automation
system for World's second
largest refinery

Weighing automation and
Visitor Management System
for Largest cement
company in Uganda

PIMS (Plant Information
Management) Enhanced plant
information management
system, streamlining data
insights and boosting operational
efficiency.

Visitor Management and
weighing automation
System for largest oil and
gas exploration company in
Nigeria

Godrej Agrovet- farmer
management system for palm
oil production
Godrej Construction- weighing
automation across all sites in
Maharashtra region

LIMS (Laboratory Management) and inventory management solution for complete tyre testing and R&D lab.

Comprehensive weighing automation solutions across global EPC operations, tailored for efficient project execution.

Complete port logistics movement monitoring solution to enhance security and visibility.
