## 1.0 Installation Phase

### 1.1 Install the Weigh Mast Version 2.5

To install and configure Weigh Mast Version 2.5 App on a system, follow these steps:

#### **Run Setup:**

Start the weighbridge software installer (WeighingSolutionSetup.exe) on your system.

Tick the box to install the SQL Server (if required), then click the 'Install' button.

#### **Complete Installation:**

Once installation is complete, check the box to launch the application, and press the 'Close' button.

### 1.2 Detecting and Solving Real Time Errors

#### **.NET Framework Error:**

If installation fails due to missing components, install .NET Framework 4.5 or enable it through Windows features. Retry installing the weighbridge software.

#### **Login Issues:**

If prompted by a popup, enter username and password (login: Admin), then click 'Login'.

#### **Successful Login:**

After successful login, the main dashboard screen will be displayed providing access to transactions, data entry, reports, and settings.
